

FAASTeam presents:

Meet the Mechanic - Pre-Flight Challenge

Completing your pre-flight checklist is an aviation ritual we have all completed. Checklists help to augment your memory, making it easier to remember the complicated series of steps we all must take to maximize the safety of our flight. Are you actively using your checklist to minimize your risk? CFI Randall Walliser leads an exercise to show pilots how to effectively use your checklists and what you might be missing to check for. CFI Randall Walliser will have students meet on the ramps of the flight center where we will have staged an aircraft with several safety issues that should be addressed during pre-flight. Pilots will take turns completing the pre-flight checklist, with the goal of finding every minor issue with the aircraft. Join us to compete against other SCFC members to see who can find all the errors/safety issues on the plane.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
